BBUS1DAS Dollars and Sense

This subject is designed to introduce undergraduate business students from all disciplines to the nature of accounting and finance and their role in business. Accounting covers the recording of financial transactions and reporting on the financial health and performance of an individual or business. Finance is concerned with the raising of funds as required to acquire the asset of a business as well as managing the expenditure and investment of these funds. In this subject, you will learn the ethical requirements underpinning financial statements, how to compile and interpret financial statements and understand sources of financing. Additionally, you will understand a budget and its importance to the business as well as the information required to make strategic planning and pricing decisions all from a non-accountant and non-finance user's perspective.

BBUS11EI Investigating Economic Issues

Economics is the study of human behaviour and in particular the choices that individuals, businesses and governments make to deal with scarcity and the incentives that guide those choices. In Investigating Economic Issues you will learn how the forces of demand and supply coordinate the behaviour of individuals and businesses in the market and how government policy affects those market outcomes. You will study the decisions that businesses make in determining how much to produce and at what cost. Further you will investigate how the market structure affects firms' choices. At the macro level, you will explain how to measure economic activity, including levels of inflation and unemployment, and you will examine some of the factors that influence these variables and the impact they have on business.
